SUMMARY

Technical Lead with over 10 years of experience delivering scalable, fault-tolerant enterprise solutions in Fintech and eCommerce. AWS Certified Solutions Architect (Associate) with a proven track record in establishing rigorous technical standards and optimizing system performance.

- **Architectural Evolution:** Expert in migrating legacy monoliths to high-performance Microservices using Clean Architecture, CQRS, and Event-Driven patterns
- **Operational Excellence:** Demonstrated success in maintaining 99.9% system uptime and improving code maintainability by 60% through automated testing and CI/CD optimization.
- **Engineering Leadership:** Specialized in scaling culture via technical mentorship and structured peer-review systems, achieving an 80% success rate in developer performance coaching.

TECHNICAL SKILLS

- **Architecture:** Microservices, RESTful APIs, Event-Driven Architecture, CQRS and Clean Architecture
- **Languages:** C#, JavaScript, SQL, HTML5, CSS3
- **Frameworks:** Next.js, React, Node.js, Vite, TypeScript
- **Cloud & DevOps:** AWS (EC2, S3, Lambda, VPC, IAM), Docker, Jenkins, Git, Terraform
- **Databases:** MySQL, MS SQL
- **AI & Modern Tools:** Prompt Engineering, Agentic Coordination

PROFESSIONAL EXPERIENCE

Tech Lead - Autoavans Technology (Sweden based Business Operations)

July 2025 - present

- Lead a cross-functional team of 4 engineers to build and scale a high-traffic financial transaction platform handling 1M+ daily requests.
- Responsible for Release management using CI/CD pipelines and GitLab and AWS Services.
- Contributed in converting React app to Vite, improving hot reload speed by 10x.
- Built fault-tolerant APIs with Polly (retry/circuit breaker), achieving 99.9% uptime.
- Architected a migration from monolithic architecture to Micro services using AWS Services, reducing system latency by 40%.

Associate Tech Lead – The Gifted Company (Sweden based Business Operations)

June 2024 - July 2025

- Implemented front end web application solution for Gifted company Card Redeem Platform using React & Next.js (Typescript/JavaScript).
- Optimized front end application code to improve data loading time by 30% with Next Js Server Side Rendering.
- Collaborated with product managers to define technical requirements and provide effort estimations for weekly roadmaps.
- Responsible for implementing required customized Google tags and integrated with Google Analytics dash boards to identify site traffic and user behavioral patterns.
- Responsible for balancing feature delivery with technical debt management.
- Responsible for communicating risks, trade-offs, and decisions clearly with product team.

Associate Tech Lead - Autoavans Technology (Sweden based Business Operations)

July 2022 – June 2024

- Responsible for migration from jQuery to React architecture, reducing regression bugs by 40% through automated testing.
- Responsible for Release management using CI/CD pipelines and GitLab and AWS Services (Cloud Watch, S3 , AWS Secret Manger).
- Mentored junior developers on clean code principles, SOLID, and modern JavaScript practices.

Senior Software Engineer – Mazarin (Sweden based Business Operations)

Sep 2019 - May 2022

- Worked on migration from C# to React .NET Core architecture, reducing regression bugs by 40% through automated testing.
- Participated in sprint planning with poker planning and collaborated on feature prioritization.

Software Engineer – Mazarin (Sweden based Business Operations)

Aug 2017 - Aug 2019

- Worked as an offshore consultant for **Total Merchant Services USA**.
- Collaborated with product managers to define technical requirements and provide effort estimations for quarterly roadmaps.

Associate software Engineer – Mazarin (Sweden based Business Operations)

Sep 2016 - Sep 2017

- Developed payment processing platform features handling \$12B+ annually for 500K+ merchants.
- Built customer management, inventory systems, and SSO solution using ASP.NET MVC and C#.
- Participated in sprint planning with poker planning and collaborated on feature prioritization.

Trainee software Engineer – Mazarin (Sweden based Business Operations)

Sep 2011 - Sep 2016

- Worked as a part time Intern while studying for my bachelor degree program
- Developed full stack web application features with C# .NET & MS SQL Server 2008.
- Responsible for performing developer testing on the application report issues to the team.

EDUCATION

- **BEng (Hons) in Software Engineering - Second Class Honors : First Division** *Sep 2010 - Sep 2015*
University of Westminster, United Kingdom.

ADDITIONAL INFORMATION

- **Languages:** English (Fluent), Sinhala (Native)
- **Key Strengths:** Team Leadership, Architecture Design, Performance Optimization, Agile Project Management, Technical Mentoring, Conflict Resolution.
- **Certifications:** AWS Certified Solutions Architect – Associate (SAA-C03)
